

Assignment #4-5 - Use case model

Large System Development

Anders Kalhauge

Fall 2017

1 Use Case Model

From the requirements in your large systems project, create a (or refine) a use case model.

The model should be as complete as possible, also be sure to respect traceability between artifacts and your requirements.

The model must have:

- A complete use case diagram.
- A brief use case description for all use cases.
- A description of all actors.
- A fully dressed use case description for the most interesting/critical use case.

Hand in

Don't hand in, but be prepared to present it Thursday October 12th
